

# LOGO DESIGN

Logo design is one of my newest skills that I have been working on. I am currently taking classes at Utah Valley University to better my skills in logo design. I have currently made over 50 logos of my own and have already freelanced 1 logo to a company in Salt Lake City. Currently I am focusing on mastering black and white logos with textures and hope to in the near future begin making color logos, along with icon design and T-shirt prints. Above are a few of my favorite logos that I have created.
