# SPARK IMAGE STUDIOS

**360 Tours and Real Estate Photography**

**High Quality Images**

Our images are taken with top of the line equipment. We shoot all of our 360 degree tours in 4k and our real estate photos in 12k resolution. That way we can guarantee the final images come out with the best quality possible to ensure we catch every amazing detail. Our amazing line of cameras give us even more flexibility to edit the photographs to your exact liking.

## WHAT I DO

WEB DESIGN

PHOTOGRAPHY

PHOTO EDITING

LOGO DESIGN

# WEB DESIGN

SLCDJ.com was my first internship website. It was used from a template as a starting point then designed by me. I am currently the web administrator of this website and put more than 40 hours of work into this website alone.

Marriottentertainment.com is my second internship website that I am a web administrator over. This website was done with me and my partner Jared Freeman. This website is a coorporate webstite which links to the SLCDJ website. This was also used with a starting template and made on Wordpress.

# Photography

I have been doing photography for 5 years now and am very passionate about it. I love doing any scenery shots or anything to do with nature

# Photo Editing

This picture on the left is my original raw photo from my camera notice the thin black line and spots in the wood where there are holes and light levels also

This picture on the right is my edited photo notice the thin black line is gone and spots in the wood where there are holes are repaired and light levels are increased to bring

# LOGO DESIGN

Logo design is one of my newest skills that I have been working on. I am currently taking classes at Utah Valley University to better my skills in logo design. I have currently made over 50 logos of my own and have already freelanced 1 logo to a company in Salt Lake City. Currently I am focusing on mastering black and white logos with textures and hope to in the near future begin making color logos, along with icon design and Tshirt prints. Above are a few of my favorite logos that I have created.
